SUMMARY

Web developer with experience in end-to-end application development and in improving internal tools. Focused on analysing processes, structuring work, and applying technical criteria to improve software efficiency and long-term maintainability. Interested in environments where I can contribute organisation, thorough review, and a practical approach to building and improving products.

EXPERIENCE

Software Developer

2025 - Presente

Ingenalia

- Development and improvement of internal tools for the management and documentation of radio communication sites.
- Implementation of automation solutions to reduce technical report generation time.
- Integration of new modules and maintenance of existing features within the internal platform.
- Analysis of workflows to identify bottlenecks and optimise digital processes.
- Direct collaboration with technical leads to define, refine, and prioritise software improvements.

Web Developer

2025

Psychologist's website in Valladolid

- Web development for a psychologist's website in Valladolid. Design and implementation with a focus on basic SEO principles and content management to improve online visibility.

Worker-owner (partner)

2018 - 2024

"La Otra" Cooperative Society

- Responsible for the WordPress website and Mailchimp management, including bug fixing, content maintenance, and digital marketing campaigns.
- Use of Geslib software for inventory and management tasks.
- Management and daily operation of the bookstore-café, including administrative tasks, personalised customer support, and sociocultural activities coordination.
